Municipal and Business—Exterior/Interior Cleaning Applications

Vapor—an environmentally friendly, effective and safe cleaning solution.

Graffiti Removal

Telephone and utility cabinets

Using environmentally friendly chemicals and vapor we are able to easily remove graffiti from virtually all exterior and interior surfaces.

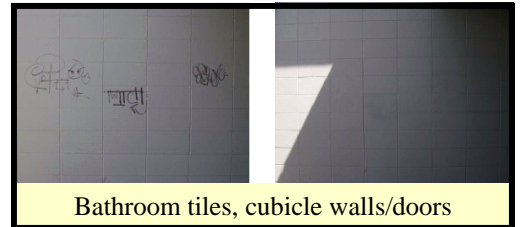

Municipal Signs

Painted/unpainted doors, walls (including brick)

The low moisture content of the vapor allows internal work to be done without creating significant amounts of waste water and poses no hazard around electrical outlets.

Bathroom tiles, cubicle walls/doors

Chewing Gum Removal

Melts away chewing gum and suctions up the waste leaving concrete free of gum residue and any staining.

Concrete and Building Interiors

Clean concrete and other interior surfaces easily removing deep stains without the mess and wastewater created with pressure washing.

Bird Waste Removal

Specialized air systems removes bird droppings from duct work. With the use of air systems (no water), disposal costs are significantly reduced. Once bird wastes are removed; steam is used to sterilize and disinfect work area.

Waste pile from between ducts

Once bird wastes have been removed from duct work they are double bagged and sealed with the use of specialized vacuum systems and are ready for proper disposal.
